D. Write 'T' for true and 'F' for false statements.

1. We can draw only straight lines, not any curved lines in Paint program. **F**
2. A polygon is a closed figure made up of only three lines. **F**
3. Foreground color is the front or the main colour. **T**
4. Edit Colors button in Colors group can help you create your own colours in Paint. **T**

E. Answer the following questions.

1. Name the tools used for doing the following tasks in Paint.

- a. To draw curved lines - Curve Shape
- b. To draw circles and ovals - Oval Shape
- c. To draw a polygon with any number of shapes - Polygon Shape
- d. To draw rectangles with rounded corners - Rounded Rectangle Shape
- e. To fill foreground color - Color 1

2. Write the steps to open the Paint program.

The steps to open the Paint Program are:

Step 1: Click the Start button on the taskbar.

Step 2: Clicking the Paint icon on the Desktop.

Step 3: Select Paint from the menu.

3. What is a polygon? Which shape tool is used to draw a polygon?

A polygon is a closed figure with more than two straight lines.

Some examples of polygons are Triangles, Squares, Rectangles, Pentagons, etc.

4. Differentiate between the terms foreground color and background color. Which group has the tools to select foreground color and background color?

Foreground Color: The foreground color is the front or the main color.

Background Color: Background color is the color of the back portion, that is, the color of the last layer of the image.

The Color group in the Ribbon tab has the tools to select the foreground and background color.
